DETAILED ACTION

Response to Arguments

Applicant's arguments, filed September 19, 2005, with respect to claims 17, 18, 20-22 and 28 have been fully considered and are persuasive. The 35 U.S.C. 103 rejections of these claims have been withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 17-18, 20-22 and 28 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6, 8 and 19-21 of copending Application No. 10/247,122 in view of Maye et al., U.S. Patent 5,583,262. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are each directed to a method for producing single-phase concentrates of hops alpha-acids (iso- and rho-iso). The methods are distinguished primarily by the choice of starting material of alpha acid, and the use of each type (isomerized, rho-iso, etc.) would have been obvious to one of ordinary skill in the art. Further, reference is made to Maye, which produces a solid version of the product, using either of these hops alpha acids.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
